ALWAYS IMITATED NEVER DUPLICATED

During the last 18 years, over 6000, Canadian Dentists have participated in Dr. Gaum's 3 Day Oral Surgery for the GP Course.

We have thousands of testimonials that speak to the quality of the course and we would like to share a few.

I attended your course 2 years ago and have pulled hundreds of Wisdom Teeth since. I loved the course and credit it with my success. Thank you so much!

Dr. Stephen Schalk

When I took your course, I had not extracted a tooth in probably ten years. However, upon request by the owner of the clinic at which I was associating, I decided to review the skill once again.

I wanted to learn from the best!

I am now able to successfully and efficiently take out any tooth! Also, the surgical instruments you recommended are a pleasure to work with. I now find that I am able to efficiently, and with great confidence, remove any tooth. Thank you so much.

Dr Don Avidar

Thank you so much for sharing your knowledge and your expert tips. In just 3 days I have learned so much and gained confidence. I do not have words to express the value of this course.

COURSE OBJECTIVE (AGD Subject Code: 310)

This course is designed for general practitioners who wish to perform more of their own surgeries. It is a step-by-step presentation of numerous minor surgical procedures that the dentist can and WILL confidently perform in the office. Participants will perform a large number of hands-on procedures utilizing anatomical specimens. The course will demonstrate techniques that have been utilized and updated successfully for over 30 years. It is important to emphasize that this seminar does not present major maxillofacial surgery such as osteotomies, fractures, condylectomies, rhinoplasties, etc. that are of no practical or clinical value to the GP. The surgical procedures that will be taught are the “BREAD and BUTTER” variety, allowing the participants to refine and update all surgical skills.

OUTCOME

Participants will learn the choice of proper instruments for each surgical technique. The proper surgical techniques, as well as pre-operative patient assessment and post-operative considerations will no longer be complicated nor a mystery. The GP will have the confidence and the skill to perform all of the surgical techniques taught in the seminar.

You are required to bring additional instruments to the course, at your own cost.

Dr. Gaum answered all my questions. He gave me the confidence as well as the clinical knowledge in regard to surgery. I am very happy I took the course. I have been practicing dentistry for over 15 years. I wished I would have taken this course 10 years back and provided my patients additional oral surgery services

-Dr. Morvarid Zebaradami

A fantastic oral surgery course for a GP. I have regained my confidence in performing imported wisdom tooth surgery as well as gained ability to perform other soft tissue surgeries. Thank you.

-Dr. Eve Kazachenko
