Such an informative common sense approach to surgical procedures; so many "Pearls" to start using everyday in all aspects of dentistry! Loved it!
Dr. Liz Hanna | October 2024

Dr. Gaum's stories and life lessons were very entertaining in addition to the fantastic course.
Dr. S Liu | October 2024

Dr. Lawrence (Larry) Gaum is an oral surgeon who maintains a private practice in Toronto, Ontario, Canada. He is a graduate of Dalhousie University Dental School in Nova Scotia, Canada. He practiced general dentistry for five years before taking his post-graduate training in Anaesthesia and Oral Surgery at the University of Pittsburgh and the Wilmington Medical Centre in Delaware. He is a former Associate Professor in Dentistry, University of Toronto, where he taught for over twenty years. He has lectured extensively throughout Canada, USA and numerous other countries, teaching his fellow dentists oral surgery, anaesthesia and pharmacology. www.drlarrygaum.com • larrygaum@rogers.com

Dr. Carly Gordon received her Doctor of Dental Surgery degree from the University of Toronto. Dr. Gordon is committed to enhancing her knowledge and skills through continuing education courses and she practices a broad range of dentistry which includes certification in IV sedation, implants and Invisalign. She completed a Fellowship in Oral Surgery and has been an instructor, lecturer and lead faculty member for **10 years** for the accredited course on Oral Surgery for the GP offered by Dr. Larry Gaum. Dr. Gordon is also a clinical instructor in the department of restorative dentistry at the University of Toronto.

COURSE OBJECTIVE (AGD Subject Code: 310)

This course is designed for general practitioners who wish to perform more of their own surgeries. It is a step-by-step presentation of numerous minor surgical procedures that the dentist can and WILL confidently perform in the office. Participants will perform a large number of hands-on procedures utilizing anatomical specimens. The course will demonstrate techniques that have been utilized and updated successfully for over 30 years. It is important to emphasize that this seminar does not present major maxillofacial surgery such as osteotomies, fractures, condylectomies, rhinoplasties, etc. that are of no practical or clinical value to the GP. The surgical procedures that will be taught are the “BREAD and BUTTER” variety, allowing the participants to refine and update all surgical skills.

OUTCOME

Participants will learn the choice of proper instruments for each surgical technique. The proper surgical techniques, as well as pre-operative patient assessment and post-operative considerations will no longer be complicated nor a mystery. The GP will have the confidence and the skill to perform all of the surgical techniques taught in the seminar.

You are required to bring additional instruments to the course, at your own cost.

“ Dr. Gaum answered all my questions. He gave me the confidence as well as the clinical knowledge in regard to surgery. I am very happy I took the course. I have been practicing dentistry for over 15 years. I wished I would have taken this course 10 years back and provided my patients additional oral surgery services

-Dr. Morvarid Zebaradami

A fantastic oral surgery course for a GP. I have regained my confidence in performing imported wisdom tooth surgery as well as gained ability to perform other soft tissue surgeries. Thank you.

-Dr. Eve Kazachenko

”

COURSE OUTLINE

DAY 1
